There is a full-time staff of three librarians and six assistants. Academic background in engineering or science would be an asset and at least two years working experience in a science and/or engineering library is essential. Salary range \$7,000-\$10,500. For all positions consideration will be given for special qualifications and relevant library experience. Graduation from an accredited library school is required. Staff benefits include one month's paid vacation, pension plan, group life insurance, and health insurance. An analysis of library systems is in progress. Stimulating, congenial atmosphere, 35-hour week; full-time staff of 116. Address letter of application and resume of education and experience to: University Librarian, Sir George Williams University, 1435 Drummond St., Montreal 25, Quebec, or telephone 514-879-2820.

14 Good Reasons Why You Should Spend \$1250 a Year for a *Permuterm*[®]*Subject Index*

1 MULTI-ENTRY INDEXING The key to *PSI*[™] indexing is title indexing in-depth by presenting alphabetized entries for every possible pairing of words in titles and subtitles.

2 SPEED AND FLEXIBILITY *PSI*'s technique of pairing words enables the user to locate any combination of terms quickly without having to examine a number of irrelevant items under a particular term.

3 SPECIFICITY AND SELECTIVITY *PSI* searches involving a single term are quick and efficient. Searches involving two or more terms are especially easy, as simple as an alphabetical look-up. Terms may even be used to exclude certain types of information.

4 UNIQUENESS The *PSI* is a "natural language" indexing system based on the real language of science, the current living vocabulary used today by publishing authors, not indexers.

5 COMPREHENSIVENESS The *PSI* policy of indexing all articles within a journal, regardless of discipline, prevents coverage gaps associated with the selective subject indexes.

6 JOURNAL SELECTION The *PSI* selection of important journals in all important fields is based, in part, on highly accurate citation analyses of their articles, not a mindless lifting of titles from other lists.

7 MULTIDISCIPLINARY SCOPE The *PSI* covers over 90 disciplines, categorizing the journals by subject and by country.

8 EXTENSIVE COVERAGE The *PSI* for 1967 covers 300,000 scientific and technological items.

9 SOURCE IDENTIFICATION All the source items are listed alphabetically by author in the accompanying *Source Index*. The source material identifies type of items as well as all co-authors and includes full bibliographic details.

10 CROSS-REFERENCED AUTHORS Comprehensive cross-references are provided for every co-author. Thus, all current articles by a given author can be identified in one place in the *Source Index*.

11 CALENDAR YEAR COVERAGE The *PSI* is a calendar year index and, for the journals covered, includes all items published and available by the end of the year.

12 TRANSLATION Foreign language titles are indexed under the corresponding English terms. Judicious man-machine editing has been applied as much as possible to standardize spelling variations.

13 RELIABILITY The *PSI* is produced by *ISI*, leader in producing proven information retrieval and dissemination services.

14 SAVINGS If you're already a subscriber to the *Science Citation Index*,[®] you can save an extra \$550. The price of the *PSI* to *SCI*[®] subscribers is a low \$700.

And there is more. Find out for yourself. Write today to Dept. 101-91. We'll send details, information and sample formats.

Institute for Scientific Information **isi**[®]
325 Chestnut Street, Philadelphia, Pennsylvania 19106, USA

❖ When we first announced the publication of *Science Citation Index*,[®] skeptics said that it couldn't be done—that we could not maintain the initial low cost of \$1250 per year for *SCI*.[®] Contrary to this pessimistic prognosis, ISI has, in effect, *reduced* the price of *SCI* by 20%. When you purchase a five-year run of *SCI* for 1964-1968, including the quarterlies for 1968, you pay only an average \$1000 for each year. The arithmetic is simple: you pay the same price for the 1968 *SCI* as when it started in 1964—\$1250—but you get the 1964 and 1965 editions at *half-price*, saving \$1250 in all. In other words, you get those five years of *SCI* for the price of four—a total discount of 20%.

❖ And consider this: Although the price in 1968 is the same—\$1250—as in 1964, the number of journals covered by *SCI* has tripled—an increase from 700 in 1964 to over 2000 in 1968!

❖ Each calendar-year edition of *SCI* is a completely different and permanently valuable reference tool. Each quarterly alone is a storehouse of information (and the quarterly issues can also be used in satellite libraries). Each annual is truly a record of the year's research—the only calendar-year index published.

❖ Don't be misled by false claims—*SCI* is the *only* index for science published based on the concept of *citation indexing*. ISI invented the *SCI*. *SCI* is the only index in which you can trace the path of related scientific ideas through the years and across the arbitrary boundaries imposed by conventional classification systems and title indexing.†

❖ The fact that the 1968 *SCI* will contain over two million citation access points might seem meaningless in itself, were it not indicative of the orderly way in which this large reservoir of interdisciplinary data has been made available to you. Each access point represents an avenue of approach into the current scientific literature—a starting point in a search—that enables you to extract precisely that information which is most relevant to each of your scientist's particular needs—time and time again.

❖ A recent article by C. C. Spencer illustrates the unique role of *SCI* in the library. "Subject Searching with *Science Citation Index: Preparation of a Drug Bibliography Using Chemical Abstracts, Index Medicus, and Science Citation Index 1961 and 1964*" can be found in *American Documentation*, Vol. 18, No. 2, pages 87-96 (1967).

❖ A final word of caution to forward-looking librarians: We all resent the high charges made for reprinted editions of important bibliographical works. So don't wait until *SCI* is out of print. We do not have an inexhaustible supply. Indeed, *SCI* sales have exceeded our expectations and supplies will be exhausted within the next few years.

❖ Now is the time for you to act. If you are planning a new library, reserve your *SCI* set now.

† We ought to know. We also publish the largest title index in the world. (It's called *Permuterm*[®] and it's sold to our *SCI* customers at a special discount.)

Did You Know that SCI is Available to You Now for an Average of \$1000 per Year?
