

Errata

In volume 1, number 2, pages 222 to 223 of the *Urology Journal*, the editorial comment and the reply by author for "Crossed Testicular Ectopia: A Case Report" were not published. We regret this error. The following is the editorial comment and the reply by the author:

Editorial Comment

The report of a crossed ectopia of testis was of my interest as it is a rare and attractive case. However, given the information provided in the case report and the figure, polyorchidism of the involved site could not be ruled out. Accordingly, the patient may have had an intra-abdominal testis in the contralateral side. Thus, a search by imaging and even laparoscopic exploration was a requisite.

Reply by Author

The authors would like to thank Dr Arshadi for mentioning this crucial point. We performed ultrasonography of the pelvis and groins meticulously and found no evidence of a crypt orchid.

In volume 2, number 4, the following error was published on the cover, the left upper figure and on page 228, the same figure: *Cyctitois* should have read *cystitis*. We apologize for this error.
